Excitation magnetic Wikipedia

An electric generator or electric motor consists of a rotor spinning in a magnetic field The magnetic field may be produced by permanent magnets or by field coils In the case of a machine with field coils a current must flow in the coils to generate the field otherwise no power is transferred to or from the rotor

Exergy Wikipedia

In thermodynamics the exergy of a system is the maximum useful work possible during a process that brings the system into equilibrium with a heat reservoir When the surroundings are the reservoir exergy is the potential of a system to cause a change as it achieves equilibrium with its environment Exergy is the energy that is available to be used After the system and surroundings reach

Multifunctional Material Systems A state of the art

An example of the potential advantages of the use of MFMS can be seen for example in electric propelled unmanned air vehicles UAVs The equation below shows that a decrease in the weight of the aircraft increases by 1.5 times the flight time whereas an increase in battery capacity only increases the same variable by a factor of 1 This supports the notion of combining battery with

Chapter 1

Chapter 1 Competing in a Global World through Chapter 4 Global Strategy as Business Model Change make up the first section According to Automotive News Market Data Books while seven countries accounted for about 80 of world production in 1975 11 countries accounted for the same share in 2005 east and the south and west Then
