Glass Wikipedia

Optical properties Glass is in widespread use largely due to the production of glass compositions that are transparent to visible light In contrast polycrystalline materials do not generally transmit visible light The individual crystallites may be transparent but their facets grain boundaries reflect or scatter light resulting in diffuse reflection

Dome Wikipedia

A dome from Latin domus is an architectural element that resembles the hollow upper half of a sphere The precise definition has been a matter of controversy There are also a wide variety of forms and specialized terms to describe them A dome can rest upon a rotunda or drum and can be supported by columns or piers that transition to the dome through squinches or pendentives
