Economics Wikipedia

Economics is the social science that studies the production distribution and consumption of goods and services. Economics focuses on the behaviour and interactions of economic agents and how economies work. Microeconomics analyzes basic elements in the economy including individual agents and markets, their interactions, and the outcomes of interactions.

Journal of Environmental Management Elsevier

The Journal of Environmental Management is a journal for the publication of peer reviewed original research for all aspects of management and the managed use of the environment both natural and man made. Critical review articles are also welcome. Submission of these is strongly encouraged. As governments and the general public become more keenly aware of the critical issues arising from how

Environmental Kuznets Curve Hypothesis A Survey

The Environmental Kuznets Curve (EKC) hypothesis postulates an inverted U shaped relationship between different pollutants and per capita income. i.e. environmental pressure increases up to a certain level as income goes up, after that it decreases. An EKC actually reveals how a technically specified measurement of environmental quality changes as the fortunes of a country change.
