Work physics Wikipedia

In physics a force is said to do work if when acting there is a displacement of the point of application in the direction of the force For example when a ball is held above the ground and then dropped the work done on the ball as it falls is equal to the weight of the ball a force multiplied by the distance to the ground a displacement

Conservation of energy Wikipedia

In physics and chemistry the law of conservation of energy states that the total energy of an isolated system remains constant it is said to be conserved over time This law means that energy can neither be created nor destroyed rather it can only be transformed or transferred from one form to another
