Black holes in fiction Wikipedia

The study of black holes gravitational sources so massive that even light cannot escape from them goes back to the late 18th century Major advances in understanding were made throughout the first half of the 20th century with contributions from many prominent mathematical physicists though the term black hole was only coined in 1967 With the development of general relativity other

Black hole Wikipedia

A black hole is a region of spacetime exhibiting such strong gravitational effects that nothingâ€”not even particles and electromagnetic radiation such as lightâ€”can escape from inside it The theory of general relativity predicts that a sufficiently compact mass can deform spacetime to form a black hole The boundary of the region from which no escape is possible is called the event horizon
